

Excellence in engine technology

Since 1949
leading the game
in engine technology

Our Passion for engines

Our Vision:

Be a leading Partner for Customers in the development of powertrain components for high performance engines

Our Mission:

Guarantee excellence and state of the art in design, engineering and manufacturing, leveraging our Italian technical know-how and creativity

Our Essence

Experience: Starting from 1949

Performances in all conditions: From sport cars to motorcycles to recreational vehicles

Competences: Every process in house

Continuous evolution: Striving for innovation

From Component Supplier to Engineering Partner

Full control of all Research and Development processes:

- **Product and process design and development**
- **Engineering**
- **Prototyping**
- **Testing**
- **Mould and tool design and development**

Constant search for new and innovative solutions for materials, product design and manufacturing processes to guarantee superior product performances

Our People

Involvement:

From workers to the management all employees are committed to success

Teamwork:

Excellence is the output of open communication and effective coordination

Very high vertical integration

All manufacturing processes in house:

- **Traditional and advanced foundry**
- **Forging line**
- **Over 25 machining centres for precision mechanical processes**
- **Various surface treatments**
- **Heat treatments**

Flexibility

A right balance among traditional and automated processes allows satisfying specific customer needs:

from special batches to small series to medium size production

Investments

A consistent and continuously updated investment plan strengthens the company's leadership position

Excellence in engine technology

Total area: 80.000 sqm with over 35.000 sqm of buildings

Pistons - Cylinders - Liners - Gudgeon pins - Piston rings - Engine blocks
